PRESS RELEASE

The morbidity & mortality from Cardiovascular Disease has increased phenomenally & according to WHO, over 60% of worlds Cardiac patients will be from India. Technology for detection & management has made significant advancement, but the fruits of development have not reached the vast rural & semi-urban population. Govt. is making great effort but problem is so vast that, govt. machinery alone cannot meet the challenge. To usher in new technology & to supplement govt's effort, Ruby General Hospital has brought the most advanced 4th Generation Cardiac Cath- Lab "ARTIS ZEE", only one of it's kind in the whole of Eastern India. Unique features are DSA capability, Roadmap facility, advanced 3D applications & clear stent, proper measurement of stent size, extra back up facility for 3 hours in case of power grid failure etc.

Ruby General Hospital Cardiac packages like angiography, angioplasty, Bypass surgery etc. are most economical among all other corporate hospitals. We are empanelled with govt. of West Bengal for providing healthcare to state govt. employees & their families at a highly economical rate. We are willing to extend this facility to larger section of the society if the State Govt. provides us necessary support.

Ms. Chandrima Bhattacharya, Hon'ble Minister of State, Health & Family Welfare, Govt. of W B has kindly consented to dedicate it to the people of Eastern India.
